## World Economic Forum on Africa

Cape Town, South Africa 3-5 June 2015

Dear Amiene,

It was with great pleasure that we once again partnered with you to deliver the transport operations for the 25<sup>th</sup> World Economic Forum on Africa.

This year we certainly scaled up the event with more airport transfers and more hotels to serve than ever before. In addition the operation lasted longer; from the first World Economic Forum staff movements all the way through until the end of the Global Leadership Fellows activities. Your team maintained an unbelievable level of energy and professionalism nonstop during the 2 weeks coping with all that we threw at them including the Community Conversations, Young Global Leader Learning Journeys and additional transportation services for the Grow Africa Investment Forum. We pushed the boundaries and your service exceeded expectations.

Furthermore the transport desk and carbon compensating opportunities for the participants went down very well, and we thank you for facilitating this service, as well as your own tree planting efforts to offset the Forum shuttle bus emissions.

I very much look forward to working with you again in the future.

Yours sincerely,

Danielle Boiston  
Deputy Head Event Operations
